The Town Administrator reminds you:

- When mowing your lawn of the Public right of way; please do not leave grass on the roadway, please pick it up. When it rains these clippings enter the storm drain, and cause blockage.
- Elections campaign signs must be placed on private property; not in the public right of way.
- Tuesday, September 14th, 2010 is Election Day. If you haven't registered to vote, please stop by the Town Hall for a form.

Desde el Escritorio del Alcalde

Estimado vecino,

Algunos residentes han estado preguntado que está sucediendo en el Parque de la calle de Crittenden. Hay dos cambios muy positivos que se están produciendo. En primer lugar, se reemplazará el antiguo área de recreo con un nuevo gimnasio y otras mejoras, y la cancha de tenis se reemplazará con una facilidad multiuso que consiste en voleibol, fútbol y baloncesto. En segundo lugar, la Comisión de los Parques y la ciudad han asociado con participantes de "Engaged Community Offshoots" (ECO) una organización afiliada a la Universidad de Maryland que promueve la agricultura urbana. Con el tiempo usted ira leyendo, viendo y oyendo más acerca este trabajo. Básicamente ellos estarán desarrollando una granja urbana para cultivar alimentos sanos y saludables para las escuelas locales y restaurantes. Las estructuras que están construyendo son invernaderos, para así permitir el cultivar alimentos durante todo el año. Siéntase libre de pasar y conocerlos, ellos están muy interesados en conocer sobre Edmonston, como a igual compartir sus conocimientos y habilidades con nuestra comunidad.

Ha habido cierta confusión sobre un aspecto del proyecto de la Calle Decatur; nuestro calle verde. Desde el principio en el proceso, indicamos que estábamos estudiando el hacer las aceras permeables (absorción de agua) para reducir la cantidad de agua de tormenta contaminadas que al salir de las canales y luego al río. En marzo de 2009, el Centro de Desarrollo de Bajo Impacto, (una firma de ingeniería ambiental local), aconsejó contra haciendo las aceras permeable y en su lugar realizando porciones de los carriles bici en las

calles permeable donde se absorben más agua (este informe está disponible en nuestro sitio Web en la sección "Going Green"). Este informe pasó a los contratistas que, a continuación, implementa el diseño. Sin embargo, nosotros no hemos actualizó la pagina de internet, ni algunas de nuestra literatura para reflejar este cambio, y leen todavía que aceras permeables eran una posibilidad. Por favor acepte mis disculpas por no actualizar nuestros materiales y causando cierta confusión.

En una nota relacionada, les invito a dejarnos saber su opinión de comolo estamos haciendo. Gran parte de nuestro trabajo es en respuesta a los comentarios que recibimos de los residentes, ya sea bueno o malo. Avísenme que estamos haciendo o no haciendo; me encantaría escucharlo. Mi correo electrónico es: mayorortiz@gmail.com y el teléfono 301-277-6052.

Antes de concluir quiero agradecer a todos los que residentes que al pesar de gran calor que sentimos el pasado 12 de junio salieron d a compartir con nosotros en la celebración de Edmonston Day ¡Gracias a ti; fue un éxito!

Muchísimas Gracias por su compromiso con nuestra comunidad.

Su alcalde,

Adam

From the Mayor's Desk

Dear Neighbor,

Some residents have asked what is going on at Crittenden Street Park in Ward 2. There are two very positive changes taking place. First, the old playground will be replaced with a new vibrant jungle gym and other upgrades,

and the tennis court will be replaced with a multi-use facility consisting of volleyball, soccer and basketball. Second, Park & Planning and the Town have partnered with Engaged Community Offshoots (or ECO, for short) an organization affiliated with the University of Maryland that promotes urban farming. You will be reading, seeing and hearing more about their work, but in short ,they are developing an urban farm to grow wholesome, healthy foods for local schools and restaurants. The structures they are building will be greenhouses, so they can grow food all year round. Feel free to drop by and introduce yourself, they are very interested in getting to know Edmonston and sharing their knowledge and skills with our community.

There has been some confusion concerning an aspect of the Green Street project. Early on in the process, we indicated that we were considering making the sidewalks permeable (water absorbing) to reduce the amount of polluted storm water that runs off into the gutter and then into the river. In March of 2009 the Low Impact Development Center, a local environmental engineering firm, advised against making the sidewalks permeable and instead making portions of the bike lanes on the streets permeable where they would absorb more water (this report is available on our website in the 'going green' section). This report was passed onto the contractors who then implemented the design. However, we did not update the website nor some of our literature to reflect this change, and they still read that permeable sidewalks were a possibility. Please accept my apology for not updating our materials and causing some confusion.

On a related note, I welcome you to let me know how we are doing. Much of our work is in response to feedback we get from residents, so if there is something good or bad, that we

are doing (or not doing) I would love to hear it. My email is mayorortiz@gmail.com and phone 301-277-6052.

In conclusion, I would also like to thank all of those residents, that inspite of the heat on June 12th; you still came and joined us to celebrate our Edmonston Day. It was a success because of you!

Stay cool and thanks for your commitment to our community.

Your mayor,
Adam

The Town of Edmonston would like to congratulate all of residents, that finished the 09-10 school year and graduated,

We also want to urge parents to keep you children in school. Your children will be tomorrow's leaders

What is SHARE and how can I participate? SHARE is a non-profit community development organization offering a nutritious food package (about a \$40.00 - \$45.00 value) to anyone for \$20.00 (add transportation in some areas) plus two hours of volunteer service. SHARE is not a governmental program and is funded solely by the price of the food package.

What is in the SHARE Value Package?

Each package contains 14-15 items consisting of 6-8 lbs. of meat, fresh fruits, vegetables, and staple grocery items (e.g., rice, pasta, potatoes, etc.). The package is designed to supplement a family's food budget with savings of up to 60% over local grocery store prices.

How does SHARE work? By pooling thousands of dollars across the nation, SHARE purchases food at wholesale prices and passes the savings on to its participants. Volunteers re-package food purchased in bulk and distribute it throughout a network of SHARE Host Sites in the DC Metropolitan area.

Who participates? People become involved with SHARE to save money and because they enjoy helping others. SHARE is open to anyone who wishes to participate by giving two hours of volunteer service and paying \$20 (add transportation in some areas) for the monthly food package. There is no income or other eligibility guidelines.

Is SHARE a charity? SHARE is a self-help program. Each person who participates in the network helps themselves obtain affordable and nutritious groceries.

CASA of Maryland was founded in 1985 by

representatives of various congregations, both Central Americans and native-born U.S. citizens. CASA was created in response to the human needs of the thousands of Central Americans arriving to the D.C. area after fleeing wars and civil strife in their countries of origin. In the basement of the Takoma Park Presbyterian Church, CASA provided emergency clothing, food, immigration assistance, and English instruction to new immigrant arrivals from Central America. CASA started with a staff of 2, a handful of volunteer teachers, and funds from various congregations.

As the community grew in numbers and its needs grew in complexity, CASA so expanded its programs. In 1991, in response to growing numbers of day laborers congregating on street corners looking for work in the Long Branch neighborhood of Silver Spring, with the support of Montgomery College and private foundations, CASA set up a temporary trailer to provide legal and employment assistance to the workers. In 1993, Montgomery County granted CASA space and funding to operate a formal Center for Employment and Training at 734 University Blvd. East, in Silver Spring. This was CASA's first workers' center, which has served as a model for the creation of numerous other centers in Maryland and across the country.

Today, CASA has programs in employment placement, vocational training, financial literacy, job development, ESOL instruction, Spanish literacy, citizenship classes, legal services, health outreach and education, health information services, social services, and community organizing and advocacy. CASA operates 3 workers' centers and a

community education center, and is in the process of opening 2 more workers' centers, a vocational training school, and a 20,000 square-foot multicultural center in the heart of Langley Park. Our offices are located throughout the state of Maryland, specifically focusing on our community in Baltimore City, and Prince George's and Montgomery Counties. CASA caters its programs to three main constituencies: low-income women, workers, and tenants.

CASA's Services Department provides services, education, and legal impact strategies that support low-income women, workers and tenants to be self-sufficient and improve their economic and social well-being. Included in the Service Department are the Health Promotion Program, Legal Program, Social Services Program, and Employment Program.

The logo for "25 YEARS ¡ADELANTE!" features the number "25" in a large, bold, orange font. To its right, the word "YEARS" is written in a purple, serif font. Below "YEARS", the phrase "¡ADELANTE!" is written in a red, italicized, sans-serif font. A purple brushstroke underline is positioned beneath the entire text.

CASA de Maryland fue fundada en 1985 por representantes de varias congregaciones, centroamericanos y ciudadanos nativos de Estados Unidos. CASA fue creado en respuesta a las necesidades humanas de los miles de centroamericanos que llegan a la

zona de D.C. tras huir de las guerras y los disturbios civiles en sus países de origen. En el sótano de la Iglesia Presbiteriana de Takoma Park, CASA proporcionó emergencia ropa, alimentos, asistencia de inmigración y instrucción de inglés para nuevas llegadas de inmigrantes de América Central.

CASA comenzó con un personal de 2, un puñado de profesores voluntarios y fondos procedentes de varias congregaciones. Como la comunidad creció en números y sus necesidades crecieron en complejidad, CASA tan amplió sus programas. En 1991, en respuesta al creciente número de jornaleros en las esquinas, buscando trabajo en el barrio de Long Branch de Silver Spring, con el apoyo del Colegio de Montgomery y fundaciones privadas, CASA creó un remolque temporal para proporcionar jurídica y asistencia para el empleo a los trabajadores. En 1993, el condado de Montgomery concedió CASA espacio y financiación para operar un centro formal para el empleo y la formación en 734 University Blvd. East, en Silver Spring. Este fue el centro de la primer trabajadores del CASA, que ha servido como un modelo para la creación de numerosos otros centros en Maryland y en todo el país.

Hoy en día, la CASA tiene programas en la colocación de empleo, formación profesional, alfabetización financiera, desarrollo de puestos de trabajo, instrucción ESOL, español de alfabetización, clases de ciudadanía, servicios jurídicos, divulgación de salud y educación, los servicios de información de salud, servicios sociales y organización comunitaria y promoción. CASA opera centros de 3 de los trabajadores y un centro de educación de la Comunidad y es en el proceso de apertura de centros de 2 más trabajadores, una escuela de formación profesional y un centro multicultural de 20,000 pies cuadrados en el corazón del Parque de Langley. Las oficinas se encuentran en todo el estado de

Maryland, centrándose específicamente en nuestra comunidad en los condados de Montgomery y de la ciudad de Baltimore y de las de Prince George. CASA abastece sus programas a tres grupos principales: las mujeres de bajos ingresos, los trabajadores y los inquilinos.

The Asian Tiger Mosquito

The Asian tiger mosquito is a very aggressive

day-biting mosquito which has become a serious pest in parts of your county. It is a black mosquito with white stripes on the legs and a white stripe down the middle of its head and back. It is very aggressive and will bite whenever people or animals are available, but it is also skittish and hard to swat. Often, you will not feel it biting and it tends to stay near the ground (you may get bitten on the legs only).

This mosquito lays its eggs in containers or holes in trees. It is closely tied to human habitation and any container in your yard which will hold even a small amount of water for a week or more can breed the tiger mosquito.

Keeping this mosquito controlled in your area will take an organized community clean-up effort. Please check your yard for water-holding containers such as:

- tires
- kiddie pools not in use
- buckets, barrels or cans
- wheelbarrows, canoes or boats
- tarps where water can puddle
- flower pots or saucers under pots

Either empty, store or rinse these containers out weekly. Don't forget rain gutters - these can breed large numbers of mosquitoes if not cleaned so that they flow.

The State's mosquito control program cannot adequately control this species due to its habits. It breeds in containers in people's yards which we cannot treat and nighttime spray operations are not very effective for the tiger mosquito because it rests in sheltered areas which the spray will not reach. If you want more information about the tiger mosquito, call your town office, or call the nearest mosquito control office.

El Mosquito Tigre

El mosquito tigre es un mosquito de origen asiático que en las últimas décadas se ha expandido por Europa y América. Es un mosquito de color muy oscuro, casi negro, con unas bandas de color blanco plateado en las patas y una ralla blanco al dorso que baja desde la cabeza hasta el tórax. Los huevos y las larvas viven en pequeñas masas de agua estancada, en áreas exteriores, cercanas a la presencia humana. Su hábitat original son los agujeros del árbol de las selvas del sureste asiático. Aquí hacen nido en masas de agua artificiales pequeñas y estancadas que les recuerdan a su hábitat original, como bidones, jarrones, platos de macetas, cubos y otros tipos de recipientes. Es un mosquito ágil que se esconde típicamente en las zonas sombreadas.

¿Qué Hace? El mosquito esta activo sobretodo de día, a primera hora de la mañana y antes de que oscurezca, principalmente en el exterior de las casas. Las hembras producen molestias a causa del elevado número de picadas que hacen a fin de obtener alimentos para la puesta de sus huevos.

La Prevención Es El Mejor Método Para El Control De Este Mosquito: Lo más importante y efectivo es evitar la puesta de huevos y el crecimiento de sus larvas acuáticas, y eliminar todos los puntos de agua donde pueden

crecer. Para ello es necesario, Vaciar los recipientes del exterior que puedan acumular agua:

- juguetes,
- ceniceros,
- jarrones, cubos,
- platos de animales domésticos,
- piscinas de plástico, etc.

Evitar acumulaciones de agua en zonas de drenaje o canales de desagüe. Evitar los agujeros y las depresiones del suelo donde se pueda acumular agua y tapar los agujeros de los troncos de árboles llenándolos de arena.

Programa de control de mosquitos del Estado no puede controlar adecuadamente esta especie debido a sus hábitos. Se reproduce en contenedores en patios de la gente que no podemos tratar y operaciones de aerosol durante la noche no son muy eficaces para el mosquito tigre porque descansa en áreas protegidas que no se alcanzará el espray. Si desea obtener más información sobre el mosquito tigre, llámenos. [Election Dates](#)
